## Career Objective

A passionate and focused AIML Engineering student with a strong foundation in programming and web development, seeking opportunities to apply my technical skills to real-world challenges and grow as a software developer.

## Projects

- Portfolio Website – Personal site built using Flask, HTML/CSS to showcase projects and skills.
- Amazon Price Tracker – Python script using BeautifulSoup & SMTP to track product prices and send alerts.
- Mini Voice Assistant – Voice-based assistant that performs basic tasks using Python speech libraries.
- Simple eCommerce Website – Built with Flask, sessions, and Bootstrap; allows product selection, cart, and checkout.
- Mini Games (Python Turtle) – Snake, Breakout, and Turtle Crossing – built for logic and UI practice.
